Alchemy connects **anything** so you can manage **everything**.

**Increase productivity**

Connect your production elements to capture real time data, eliminate errors and accelerate improvement cycles

**Safeguard your data**

Protect your business with built in security and complete regulatory compliance including 21 CFR Part 11

**Improve data management**

Make better decisions with connected, unified data flow and full production traceability

**Simplify & sustain**

Simple, customisable user interface ensures easy adoption and usage across your business with complete performance transparency

**No compromises required**

Our hardware agnostic software means you can combine the exact elements your business needs to enable seamless production across the factory

**Supported by Olmec**

With focused training, remote monitoring, analytics and full partner network; we've got your back now and in the future

## Connection examples

Beckhoff · Omron · Siemens · Rockwell · Videojet · Domino  
Markem · Cognex · Halcon · Herma · SAP · MES
